## Give Us Your Input!

SEP 20 1999

Public input from thousands of Californians has already helped shape the CALFED Bay-Delta solution. However, there are many significant issues that still need to be decided. Please fill out this form and tell us what you think is important when developing an equitable, feasible and durable Bay-Delta solution.

### Comments:

Dear Sir,

As a tax paying, voting, conservationist, I object to several aspects of your draft plan.

1. The building of more dams is both bad economically and bad for the environment. It costs less to tap ground water (storage locations \$90 / acre ft. vs \$1,750 / acre ft.). The dams & the reservoirs also change the water quality & temperature.
2. The building of the peripheral canal project (I understand that you have changed the name to protect the quality) would certainly damage the Bay's water quality & also lead to more concentration in the S.A. area. This is a bad idea.
3. Plan should include specifics to reduce toxins in our water.

Use additional sheets if necessary.

Please clip out this form, fold, staple and return to:
